CAREER OBJECTIVE

A dedicated Frontend Developer with 3+ years of experience, specializing in Vue.js, Quasar and Astro. Passionate about crafting intuitive, high-performance user interfaces and eager to grow further in backend development and DevOps. Seeking to contribute to high-quality product teams with a strong focus on clean design, maintainable code, and user experience.

PROFESSIONAL STRENGTHS

- Experienced in Agile/Scrum practices, including daily stand-ups, sprint planning, and retrospectives.
- Strong collaboration with backend developers, QA, and business analysts to ensure smooth delivery.
- Proactive in taking ownership, resolving blockers, and supporting team members.
- Open to feedback and capable of suggesting improvements in UI/UX and logic flow.
- Proficient with Jira, Trello, Git, Slack, and Notion for task and workflow management.
- Mentored junior developers in Git workflow, code quality, and component-based design.

WORK EXPERIENCE

Fresher Developer

CATTHAI Co.

Mar 2022 - Aug 2023 Ho Chi Minh City

- Developed intuitive UI/UX for company websites using HTML, CSS, JavaScript and SCSS
- Maintained and updated existing websites, improving their functionality and design
- Monitored website performance and resolved technical issues promptly

Middle Developer

CATTHAI Co.

Aug 2023 - current Ho Chi Minh City

- Designed and developed web applications using modern frameworks like Vue.js, Quasar, Primevue, Astro, Nuxt.js, Node.js...
- Integrated APIs to enhance functionality and streamline data management
- Conducted user testing and implemented feedback to improve user experience and interface

PROJECTS

Enterprise KPI Management System

Frontend Role

May 2023 - current

Technologies: Vue.js, Quasar, Vite, HTML, CSS, SCSS, JavaScript, Docker, CI/CD, Cypress E2E Testing, PWA

- Developed a comprehensive KPI management web application for enterprise goal tracking and organizational data management
- Built user-friendly interface with keyboard shortcuts, visual charts, and detailed data tables for enhanced user experience
- Implemented role-based access control for System Administrators, Department Heads, and Employees with distinct permissions
- Features include Excel data import, organizational structure management, goal allocation, real-time reporting, and multi-language support
- Integrated PWA capabilities with push notifications and caching for improved performance

Document Workflow Management System

Frontend Role

Jan 2024 - Dec 2024

Technologies: Vue.js, Quasar, Vite, Cordova, Vue Flow, HTML5-QRCode, Pinia

- Created a document tracking system with drag-and-drop workflow builder similar to draw.io
- Developed mobile companion app with RFID authentication and QR code scanning capabilities
- Implemented visual workflow management with node-based process creation and real-time progress tracking
- Built administrative dashboard for process monitoring, location management, and workflow visualization

Plant E-commerce Platform

Creator

Jan 2025 - Mar 2025

Technologies: Vue.js, Quasar, Pinia, Supabase

Live Demo: <https://trees.yonnon.site/>

- Built full-featured e-commerce platform specializing in plant sales with complete buyer/seller functionality
- Implemented user authentication, product management, inventory tracking, and seller profile management
- Integrated multiple payment methods including QR code payments via MoMo and banking systems
- Features include shopping cart, order tracking, product reviews, and comprehensive admin dashboard

Personal Blog Website

Creator

Jan 2025 - current

Technologies: Vue.js, Astro, JavaScript

Live Demo: <https://yonnon.site>

- Developed optimized personal blog focused on language learning and coding tutorials
- Implemented performance optimization, RSS feeds, pagination, and SEO-friendly architecture
- Created responsive design with modern UI/UX principles for enhanced reading experience

Ziha Movie Streaming Platform

Creator

Jan 2025 - April 2025

Technologies: Vue.js, TypeScript, PrimeVue, Third-party APIs

Live Demo: <https://movie.yonnon.site>

- Built anime streaming platform with modern, animated UI and smooth user experience
- Implemented advanced features including search functionality, detailed movie pages, server switching, and pagination
- Integrated third-party APIs for real-time content delivery and comprehensive movie database
