EDUCATION

Bachelor
Software Engineering
Industrial University of Ho Chi Minh City
Sep 2019 - Oct 2024

SKILLS

Professional Skills

- Team Leadership & Mentoring
- Agile/Scrum Methodologies
- Project Management
- Problem Solving
- Cross-functional Collaboration
- Technical Presentation
- Code Review & Quality Assurance
- User Experience Design

Languages

- English (Fluent)
- Chinese (Fluent)
- Japanese (Basics)

CERTIFICATIONS

- Responsive Web Design (freeCodeCamp) - July 2024
- JavaScript Algorithms and Data Structures (freeCodeCamp) - July 2024
- English C1 Level (TOEIC Score: 600+) - 2024

ACTIVITIES

- GO JAPAN (FPT Software) - Nov 2024

CAREER OBJECTIVE

Frontend Engineer with almost 4 years of experience building scalable, high-performance web applications across enterprise SaaS, AI-powered platforms and KPI systems. Proficient in the Vue.js ecosystem with a strong focus on clean architecture, user experience, and cross-team collaboration. Currently contributing to AI-native real estate solutions at a global product company, with a drive to grow toward full-stack development and product ownership.

PROFESSIONAL STRENGTHS

- Expert-level proficiency in Vue.js ecosystem including Vue 3 Composition API, Quasar Framework, Nuxt.js, and state management with Pinia for building scalable single-page applications
- Advanced JavaScript/TypeScript development with ES6+ features, async programming, and modern build tools like Vite for optimized development workflows
- Comprehensive experience in responsive web design using HTML5, CSS3, SCSS, and component libraries like PrimeVue for consistent UI implementations
- Full-stack capabilities with backend integration experience using Node.js, RESTful APIs, GraphQL, and database management with Supabase/PostgreSQL
- DevOps and deployment expertise including Docker containerization, CI/CD pipelines, PWA development, and performance optimization techniques
- Testing and quality assurance proficiency with Cypress E2E testing, code review practices, and maintaining high code quality standards
- Mobile development experience using Cordova for cross-platform applications with native features like RFID integration and QR code scanning

WORK EXPERIENCE

Frontend Engineer

Moatable – Lofty Team
May 2025 – Present | Ho Chi Minh City

- Joined the Lofty product team — an AI-powered all-in-one platform for real estate professionals — within Moatable's portfolio of AI-native SaaS solutions.
- Collaborated daily with Vietnamese and Chinese cross-functional teams (PM, Design, QA, BE, DevOps) in an Agile workflow, delivering features aligned with detailed PRDs and full product flows.
- Contributed to the **Smart Plan** feature: a marketing automation workflow engine enabling agents to build, schedule, and manage automated follow-up sequences (emails, texts, tasks, reminders) triggered by lead behavior and custom criteria.
- Involved in **Lofty AI** feature development — spanning Sales Agent, AI Workflow, Homeowner Agent, and Agent Studio — helping automate lead nurturing, social media management, and custom AI agent deployment for real estate professionals.
- Authored developer documentation and AI training materials; guided the AI tooling on codebase conventions and project workflows to support AI-assisted development.

Middle Developer

CATTHAI Co.
Mar 2022 - May 2025 | Ho Chi Minh City

- Progressed from Fresher to Middle Developer, leading frontend development across multiple enterprise web applications using Vue.js 3, Quasar, Nuxt.js, Astro, PrimeVue, and Node.js.
- Architected and led the frontend of an enterprise KPI management system — delivering role-based access control, Excel import/export, real-time dashboards, PWA with offline support, and Cypress E2E test coverage.
- Integrated RESTful APIs, GraphQL endpoints, and WebSocket connections; maintained high performance and cross-browser compatibility across all delivered products.
- Mentored junior developers through code reviews, established team coding standards, and drove UX improvements informed by usability testing and user feedback.

PROJECTS

Lofty – AI-Powered Real Estate Platform

Frontend Engineer · Moatable
May 2025 – Present

Team Size: 100+ (cross-region: VN & CN)
Technologies: Vue.js 2/3, LogicFlow, JavaScript, TypeScript, LESS, RESTful APIs, WebSocket
Website: lofty.com

- Built and iterated on the **Smart Plan** automation module — a workflow engine for configuring lead nurturing sequences with conditional triggers, multi-channel actions, and real-time enrollment tracking.
- Contributed to **Lofty AI** features including AI Workflow builder, Agent Studio, and Homeowner Agent — enabling agents to deploy intelligent automations without code.
- Followed end-to-end product delivery process: PRD review, design handoff, feature implementation, QA coordination, and deployment — maintaining high release quality across sprints.

Enterprise KPI Management System

Lead Frontend
May 2023 - current

Role: Frontend Team Lead
Team Size: 8 members (1 PM, 3 Frontend, 2 Backend, 2 BA)
Technologies: Vue.js, Quasar, Vite, HTML5, CSS3, SCSS, JavaScript, Docker, CI/CD, Cypress E2E Testing, PWA

- Developed a comprehensive enterprise-level KPI management system used in collaboration with a Big4 Company in Vietnam, supporting real-world enterprise performance tracking and analytics
- Built intuitive user interface featuring keyboard shortcuts, interactive data visualizations, advanced filtering, and detailed reporting tables for enhanced productivity
- Implemented robust role-based access control system supporting System Administrators, Department Heads, and Employees with granular permission management
- Engineered advanced features including Excel data import/export, organizational hierarchy management, automated goal allocation, real-time reporting, and multi-language support
- Integrated Progressive Web App capabilities with push notifications, offline caching, and background sync for improved performance and user engagement

---

Personal Blog & Portfolio Website

Full-stack Developer & Creator
Jan 2025 - current

Technologies: Vue.js, Astro, JavaScript, Markdown, RSS, SEO Optimization
Live Demo: yonnon.info

- Developed high-performance personal blog and portfolio website focused on language learning resources, coding tutorials, and technical documentation
- Implemented advanced performance optimization techniques including lazy loading, image optimization, RSS feeds, pagination, and comprehensive SEO-friendly architecture
- Created modern responsive design following UI/UX best practices with enhanced reading experience, dark mode support, and accessibility compliance (WCAG guidelines)
