EDUCATION

Bachelor
Software Engineering
Industrial University of Ho Chi
Minh City
📅 Sep 2019 - Oct 2024

SKILLS

Frontend

- Vue.js 2/3, Nuxt.js, Quasar
- TypeScript, JavaScript (ES6+)
- Pinia, PrimeVue, Vite
- HTML5, CSS3, SCSS, LESS

Backend & Data

- Node.js, Express.js
- RESTful APIs, GraphQL, WebSocket
- PostgreSQL, Supabase

Testing & DevOps

- Cypress E2E
- Docker, CI/CD
- PWA, Service Workers

Tools & Methods

- Git, Jira, Figma
- Agile / Scrum
- Code Review, Mentoring

Languages

- English – Professional Working Proficiency
- Chinese – Professional Working Proficiency
- Japanese – Basic

ACTIVITIES

- GO JAPAN (FPT Software) - Nov 2024

PROFESSIONAL SUMMARY

Frontend Engineer with 4 years of experience building and maintaining enterprise SaaS products using Vue.js, TypeScript, and modern frontend tooling. Contributed to AI workflow features at Moatable (lofty.com) a global product company with 100+ engineers across Vietnam and China including a full codebase refactor of a 5-year-old legacy system completed within 2 months. Previously at CATTHAI, architected and delivered a KPI platform used by 1,500+ employees in collaboration with a Big4 company (petroleum industry). Focused on writing scalable, maintainable code and contributing meaningfully across the full feature lifecycle.

WORK EXPERIENCE

Frontend Engineer

Moatable – Lofty Team

📅 May 2025 – May 2026

📍 Ho Chi Minh City

- Contributed to the migration of **Smart Plan v2** from a legacy Vue 2 monolith to a Vue 3 node-based drag-and-drop engine (LogicFlow), delivered within a strict 2-month deadline with 100% backward compatibility for all existing enterprise workflow data.
- Built UI for **Lofty AI** features including AI Workflow builder and Agent Studio tools enabling real estate agents to configure and deploy automated lead nurturing sequences without writing code.
- Worked in a cross-regional Agile team (VN + CN, 100+ engineers) collaborating with PM, Design, QA, and Backend through full feature lifecycle: PRD review → implementation → QA coordination → release.
- Maintained code quality through regular reviews; wrote technical documentation to onboard new team members and align AI tooling with codebase conventions.

Middle Frontend Developer (Progressed: Fresher → Junior → Middle)

CATTHAI Co.

📅 Mar 2022 - May 2025

📍 Ho Chi Minh City

- Led frontend development across multiple enterprise web applications using Vue.js 3, Quasar, Nuxt.js, and Pinia owning architecture decisions and component design from scratch.
- Architected and delivered a full-scale KPI management system for a 1,500+ employee enterprise in collaboration with a Big4 company (petroleum industry) handling data-dense dashboards with real-time WebSocket updates at sub-second rendering under high mutation rates; included RBAC, Excel import/export, and PWA with offline sync.
- Integrated RESTful APIs, GraphQL endpoints, and WebSocket connections; wrote Cypress E2E test suites that reduced regression issues by ~40% across releases.
- Mentored 3 junior developers through code reviews and established team coding standards adopted across all projects.

PROJECTS

Lofty AI-Powered Real Estate Platform

Frontend Engineer · Moatable

📅 May 2025 – May 2026

Team Size: 100+ (cross-region: VN & CN)

Technologies: Vue.js 2/3, LogicFlow, JavaScript, TypeScript, LESS, RESTful APIs, WebSocket

Website: [lofty.com](#)

- Built and iterated on the **Smart Plan** automation module a workflow engine for configuring lead nurturing sequences with conditional triggers, multi-channel actions, and real-time enrollment tracking.
- Contributed to **Lofty AI** features including AI Workflow builder, Agent Studio, and Homeowner Agent enabling agents to deploy intelligent automations without code.
- Followed end-to-end product delivery process: PRD review, design handoff, feature implementation, QA coordination, and deployment maintaining high release quality across sprints.

Enterprise KPI Management System

Frontend Team Lead

📅 May 2023 - current

Role: Frontend Team Lead

Team Size: 8 members (1 PM, 3 Frontend, 2 Backend, 2 BA)

Technologies: Vue.js, Quasar, Vite, HTML5, CSS3, SCSS, JavaScript, Docker, CI/CD, Cypress E2E Testing, PWA

- Delivered enterprise-wide KPI platform across 30+ departments in collaboration with a Big4 company (petroleum industry) — supporting performance tracking, goal allocation, and analytics at scale
- Built data-dense UI featuring keyboard shortcuts, interactive charts, advanced filtering, and reporting tables reducing manual reporting time for department heads
- Implemented role-based access control with 3 permission tiers (System Admin, Department Head, Employee) and granular feature-level access management
- Engineered Excel import/export, org hierarchy management, automated goal allocation, real-time reporting, and multi-language support (Vietnamese/English)
- Delivered PWA with push notifications, offline caching, and background sync enabling full functionality without internet access in field environments

Personal Blog & Portfolio Website

Full-stack Developer & Creator · Side Project

📅 Jan 2025 – Present · Maintained alongside full-time work

Technologies: Vue.js, Astro, JavaScript, Markdown, RSS, SEO Optimization

Live Demo: [yonnon.info](#)

- Developed high-performance personal blog and portfolio website focused on language learning resources, coding tutorials, and technical documentation
- Implemented advanced performance optimization techniques including lazy loading, image optimization, RSS feeds, pagination, and comprehensive SEO-friendly architecture
- Created modern responsive design following UI/UX best practices with enhanced reading experience, dark mode support, and accessibility compliance (WCAG guidelines)
